Sara—can we set up a short status call today or Monday on the submission and implementation of the Repair Plan for the AD roof and gaskets and mixer #2?
Thanks, Bill

Joe is at a training until tomorrow. I am sure he will get back with you then. Thanks.

Sara

I have left a voice mail with Joe this morning to discuss the results. Hopefully he got it. I will try him again a little later this afternoon.

Thanks

Ron

Bill: We have some questions regarding the monitoring results.

The Receiving Bay East Monitor read over H2S IDLH on 10/13/2018 at 2:23PM. It read 195.3 ppm which is 95.3 over the IDLH. We would like to know where the monitor is located and if Big Ox can tell which truck or source of waste was in the receiving bay east at the time. Was the waste source unloading at the time?

Was the area evacuated or were any other health and safety precautions taken? We may have some follow-up questions to these.
